

## Preparing EvalColor for an English use.

1/ Evalcolor may be used in several languages.  
Choose a language and before leaving, save the preferences.  
However, the questionnaires don't change so easily.

- - - - -  
If you plan an usual use in English, please do the following:

2/ Save the Questionnaires contained in the Excel folder of EvalColor.  
Thus you'll keep the french version.

3/ Unzip the folder QreEnglish and replace in the Excel folder the Qre\*.xls files by those files which are inside the QreEnglish folder.

4/ You can replace the Evalueur.xls file by the one contained in the English folder.  
Before replacing it, you can add some new evaluators.

- - - - -  
In addition

5/ For any questionnaire, you might want to modify it.

Beware:

The beforelast line must remain blank.

The last line remains as it is: it explains the contents of the columns.

The first column contains numbers in a sequential order.
